

# Partnering for a more beneficial Blue

Utilizing and combining affordability, quality and convenience, Teladoc and Catapult Health have partnered to help members get the care they need when they need it.

Teladoc is the largest, most trusted provider of virtual care delivery in the world. We provide a single solution to address the full spectrum of care from non-critical, episodic needs to the most costly, complex medical conditions.

 Catapult Health, a national in-network Provider for BCBS, brings next generation preventive checkups to worksites across America. With no deductible, co-pay or out-of-pocket fees, preventive care claims are filed and Catapult is covered 100% by BCBS.

### How the partnership works

Catapult Health Preventive Checkups provide a high-quality entry point for Teladoc. When administered together, members are more fully engaged and follow-up Teladoc consults facilitate clinical action for those in need of a prescription or additional clinical care.

## 5 partnership benefits

1

Onsite comprehensive health assessment with a licensed nurse practitioner and ability to take immediate action on a clinical treatment plan, including expert second opinion and complex case consults

2

A holistic member experience including preventive testing, goal setting, an action plan and a follow up with a board-certified physician, if necessary

3

The convenience of real time care so no member is forgotten in follow ups, adding greater clinical value and overall outcomes

4

Employers with both Catapult Health and Teladoc have no extra fees, resulting in greater clinical value

5

Exclusive use of Abaxis equipment in a workplace setting, allowing for lab quality point-of-care testing in 13 minutes

80% of most working Americans don't get their annual preventive checkup, even though it's 100% covered by their employer.

That's why Catapult delivers Preventive Checkups at worksites across America. With Catapult, preventive care compliance is dramatically increased, chronic conditions are discovered and diagnosed, and patients are connected with the health improvement programs they need most. In just 30-40 minutes, a Personal Action Plan is created and employees are back to work.

## The numbers say it all

The results of a 4-year cohort study of over 9,000 patients

**23%** reduction in Metabolic Syndrome

**32%** reduction in Pre-Diabetes

**76%** reduction in Severe Hypertension

The results of a proven, consistent solution
